

CLAIMS

1. A pressurising device for clearing of passageways of liquids and fluids comprising:
 - a piston for pressurizing a clearing agent;
 - 5 • a cylinder for containing said clearing agent, and
 - a coupler for connecting said cylinder to a treated device.
- 10 2. A pressurising device for clearing of passageways as in claim 1 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.
- 15 3. A pressurising device as in claim 1 for flushing a hand – piece of a dentist, comprising:
 - a piston for pressurizing a cleansing fluid;
 - a cylinder for containing said cleansing fluid, and
 - 20 • a coupler for connecting said cylinder to a coupler of said hand – piece.

4. A pressurising device as in claim 3 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.
5. A pressurising device for clearing of passageways as in claim 1
5 for clearing pneumatic system.
6. A pressurising device for clearing of passageways as in claim 1
for clearing hydraulic systems.
